

TEACHING SUPPORT SERVICES REVIEW

Australian
National
University

Agenda

01 Background

02 Method

03 Current State

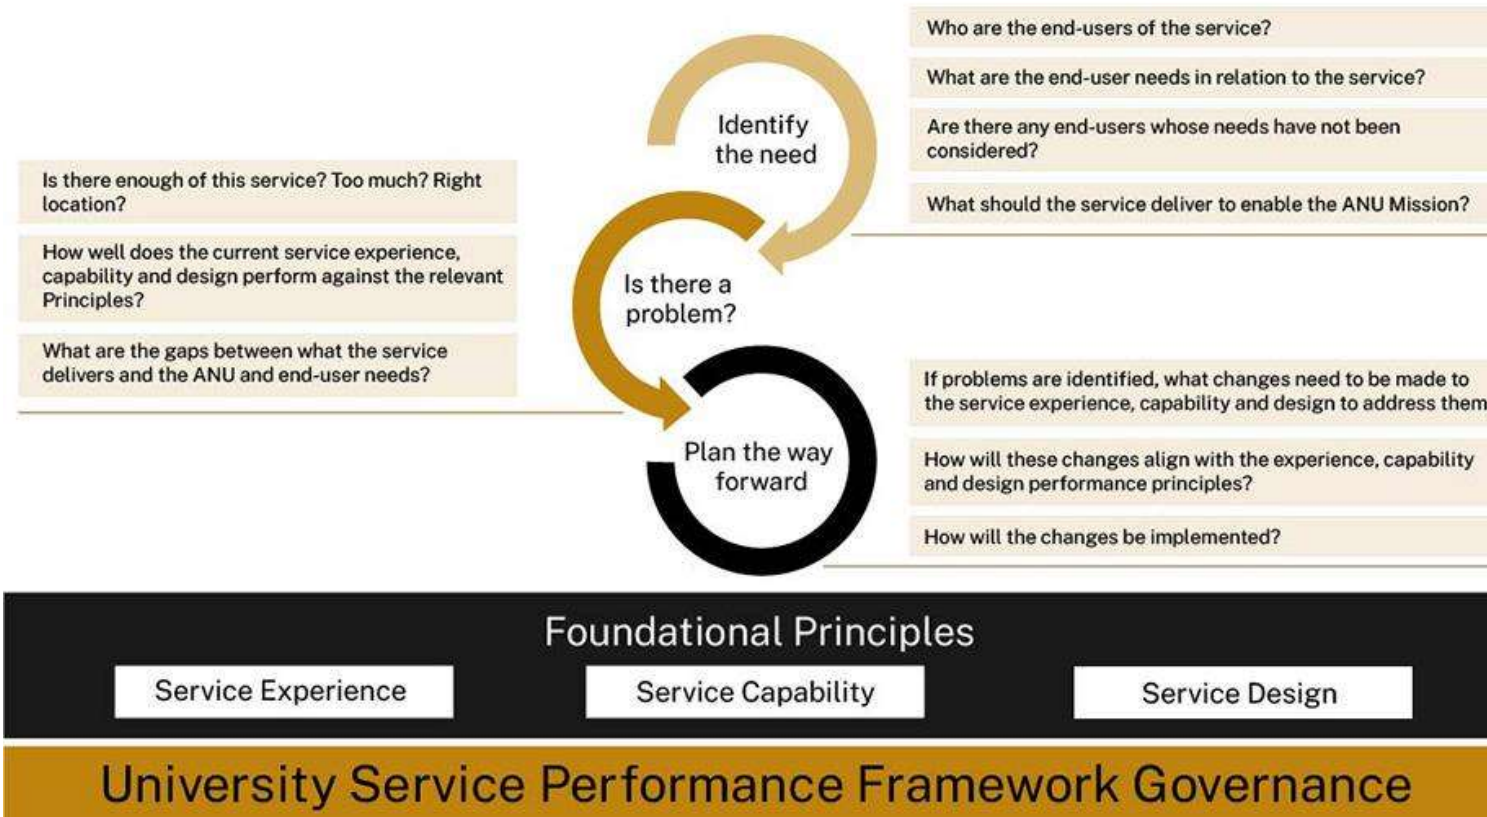

04 Recommendations

05 Next Steps

01 BACKGROUND

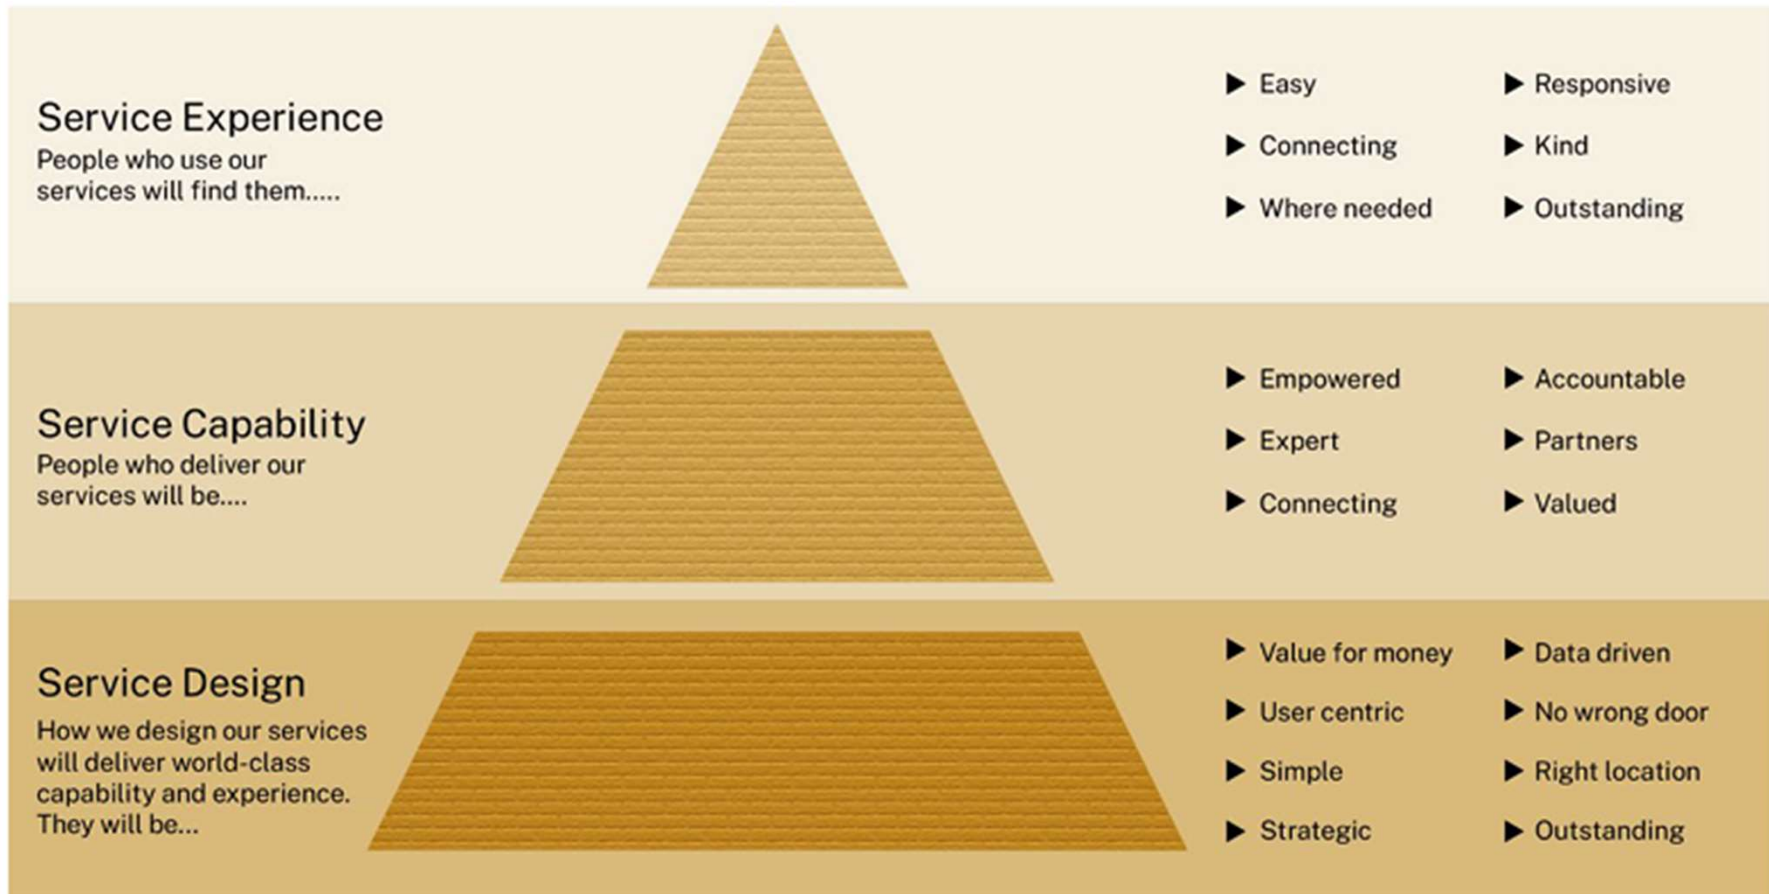

ANU Service Performance Framework

ANU Service Performance Framework

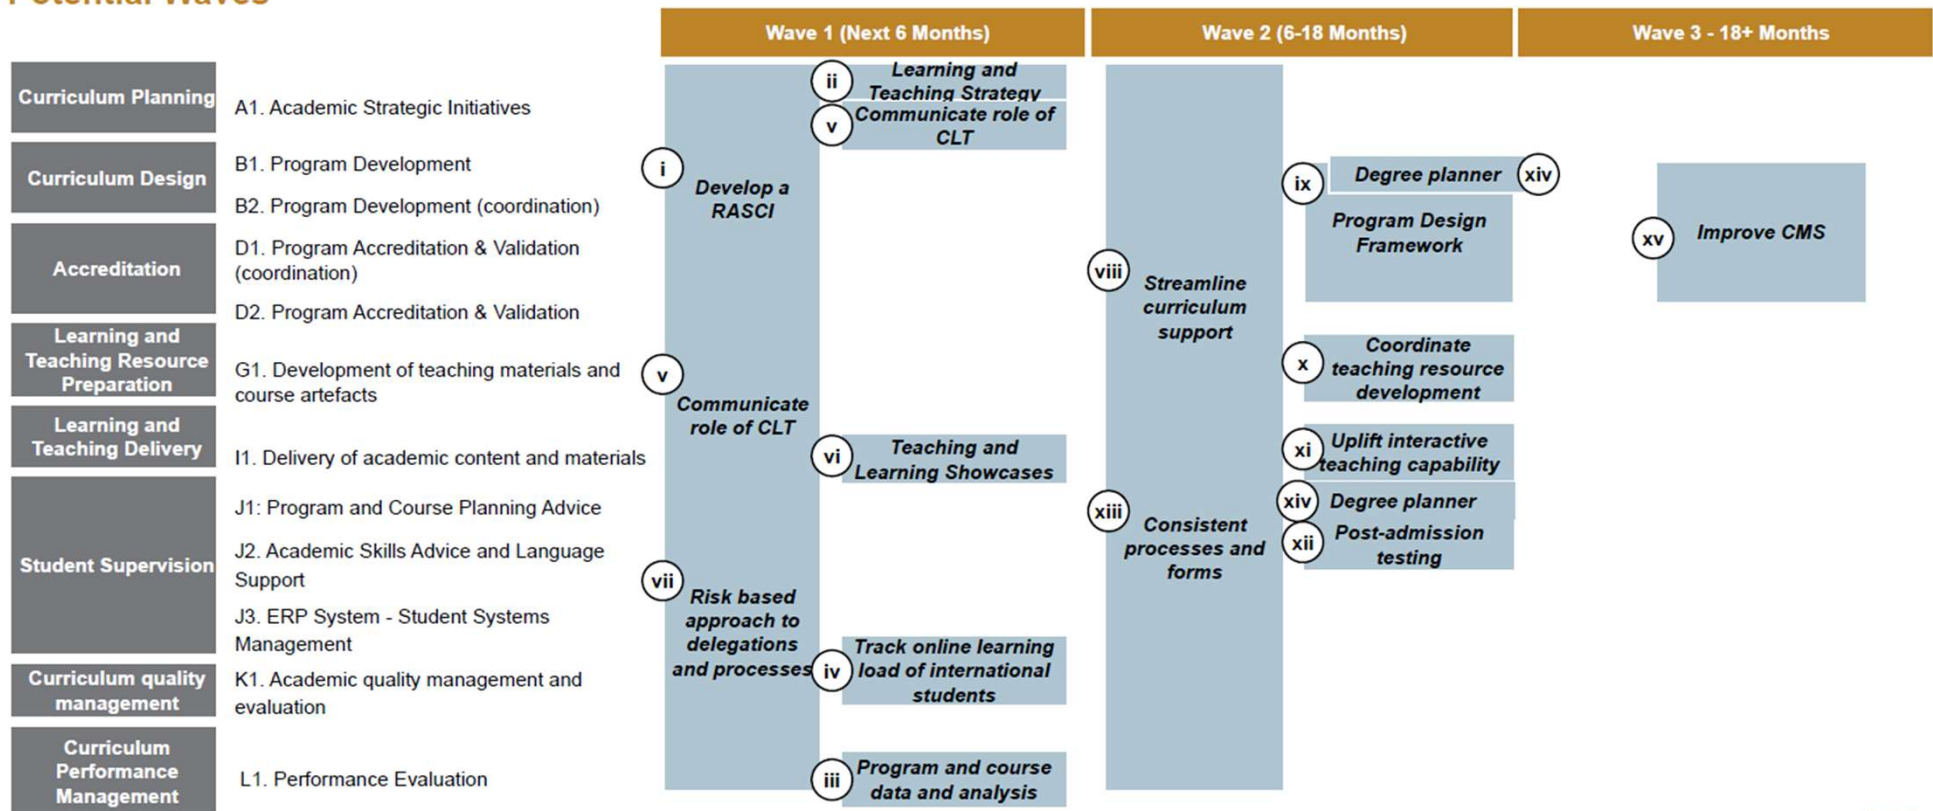

Service Principles

ANU Service Performance Framework Teaching Support

After proof points are built it would involved significant activity in the 6-18 month horizon

Potential Waves

02 METHOD

1. Survey of CLT staff – service based - completed
2. Benchmarking with other institutions - completed
3. UniForum data - completed
4. Current state mapping - completed
5. Future state definition – not completed

03

BENCHMARKING

Benchmarking

- Survey was sent to all Australian universities
- Six responses received – QUT, JCU, Swinburne, UQ, Macquarie, CDU
- Current challenges include learner engagement, academic integrity, academic professional development framework & digital transformations
- QUT is implementing a new LMS that will deliver a mandatory first year undergraduate experience
- CDU calls out the linking of L&T Design with Quality units
- CDU completed a review 18 months ago that re-centralised many of the design staff

05 CURRENT STATE

Current State Mapping

- Two workshops – one with CLT, one with Colleges
- Academic Student Journey of course management
- Pain points & Opportunities
- Workshops did not allow for significant discussion of the pain points or opportunities
- Mapped feedback from surveys into the journey prior to the session with CLT

06

RECOMMENDATIONS

Role Clarity

- Relaunching CLT with clarity on the baseline service offered by the team across all service areas to all who seek the service
- Better coordination between CLT and Colleges – regular opportunities to collaborate and co-design services, to share news, and to discuss gaps in services so they are filled in the right spot
- One stop shop approach by CLT – improved website, improved communication/enquiry channels, data analytics
- CLT to be the leaders of education design & teaching support services – must take ownership of the discussions
- Formally adopt the Hub and Spoke service model for Learning Design and other CLT services, where CLT is the Hub and Colleges are the Spokes

Teaching Experience

- Develop a new induction program for new teaching academics which can be commenced at any time and provides support across a variety of services with links to student administration processes
- More communication from leaders
- Easy access to support self-service options
- Professional development/training framework to be developed and offered annually for the whole teaching academic lifecycle

Systems

- Improved system support guides & training
- Consistent course site templates and support
- 'Safe spaces' to test and pilot innovations for academics
- Improved learning analytics
- Real time tracking of student concerns and issues
- Pre-teaching testing of all teaching spaces to ensure they are fine to use from week 1 on
- Equipment that works in rooms

SELT & Teacher Recognition

- Simplified student feedback mechanisms throughout a course and program
- Clearly mapped developmental journey for all who teach at ANU
- Promotion of excellence in teaching practice and sharing practice
- Improved accountability for SELT outcomes – poor teaching to see consequences, good teaching to see recognition

Structural Changes

- No major recommendations came from the workshops on changes to services offered by CLT
- Continuing Education is excluded from similar teams at other institutions and this should be under consideration for ANU
- Current distribution of Teaching Support staff across ANU could point to inefficiencies and may be a symptom of a lack of clarity of CLT role rather than intent. Tying this to role clarity may reduce the reliance on staff in Colleges/Schools

04

NEXT STEPS

Where to next?

- Provide the current state map to workshop attendees
- Future state
 - Define the future state
 - Play back future state to workshop attendees
 - Develop list of actions needed to achieve future state
 - Implement future state
- Relaunch CLT
- Develop Communication plan for relaunch and post-launch
- Establish networks/communities of practice

THANK YOU
